WESCO

The Worldwide Leader in Halon Management & Banking

WESCO - a name synonymous with responsible halon management and banking, has met the continuing needs of more companies in more industries than any other halon banking company. Our business is worldwide in scope and is counted on by the largest and most demanding companies in the defense, aerospace, petrochemical, marine, and fire protection industries.

Our products and services cover the full range of halon and clean agent recovery, reclamation and recycling activities, including recycling to international quality standards, system recharging and servicing (on site if necessary), and long term halon bank management. We offer 24 hrs a day, 7 days a week recycling and refill emergency service on any time sensitive refill job. Our product line consists of halon 1301, halon 1211, HFC-227ea (FM-200), FE-36, FE-25, Halotron and Novec 1230!*

In addition to our halon and clean agent services, we are proud to offer a full range of fire fighting foams and dry chemicals!

We are committed to responsible halon management and strictly comply with the Voluntary Code of Practice established by the Halon Recycling Corporation, as well as the U.S. Environmental Protection Agency's Guidance for the EPA Halon Emission Reduction Rule (40 CFR, Part 82, Subpart H). And, since we conduct business in many different countries around the world, we are familiar with, and strictly adhere to, host-country and international regulations.

When reliability, service, and professionalism matter, call Wesco: Halon Management & Banking!

**FM-200 is a registered trademark of Great Lakes Chemical. FE-36 and FE-25 are registered trademarks of Dupont. Halotron is a registered trademark of American Pacific. Novec 1230 is a registered trademark of 3M.*

WESCO GOLD SERVICE

We guarantee a response any time of day or night! When you have a system discharge and time is of the essence, call our 24 hrs a day 7 days a week monitored hotline at 1-800-433-1751 and ask for our Wesco Gold service. Our toll free hotline is monitored at all times - even holidays.

We guarantee your cylinder will not "stop"! With Wesco Gold service, your cylinder will be picked up ASAP by a freight carrier contracted by Wesco, no matter what time, day, or place, with nonstop transportation until it reaches our facility. We will begin work immediately on it, working through the night if necessary, in order to return your cylinder back to you as soon as possible. On its return journey, your cylinder will not stop at any ports. Your cylinder will be refilled and delivered to you in the fastest way possible!

We guarantee constant availability of Halon 1301, FM-200, and Halotron! We maintain large quantities of halon 1301, FM-200, and Halotron at all times. We will always have inventory on hand to fill the smallest or largest of jobs!

We guarantee responsible, reliable, and speedy service! We won't rest until your cylinders are refilled and safely back into place at your facility. At the same time, we will constantly operate in a safe and responsible manner every step of the way. We want to get the job done right!

FIRE FIGHTING FOAMS

We sell foam! We are proud to carry a full line of Ansul fire fighting foams and dry chemicals. Ansul's complete fire suppression line is the most advanced and environmentally safe foams and powders on the market. When ordering from Wesco, you can be sure you are getting a superior product at a price made to meet YOUR needs! We ship all foam and powder from either our Metuchen, NJ warehouse or direct from our supplier, with a variety of shipping methods tailored to your company's location and situation.

Foam Fire Fighting Concentrates (AFFF): Aqueous Film Forming Foam Concentrates

These foams can be used in 1%, 3%, and 6% proportioning rates on Class B hydrocarbon type fuels (crude oil, gasoline, kerosene, diesel fuel, and aviation fuels) and can be mixed with either sea water or fresh water. All are UL listed, and include:

- Ansulite 1% AFFF Concentrate
- Ansulite 3% Freeze-Protected AFFF Concentrate
- Ansulite 1% Freeze-Protected AFFF Concentrate
- Ansulite 6% AFFF Concentrate
- Ansulite 3% AFFF Concentrate
- Ansulite Premium 6% AFFF Concentrate Mil Spec
- Ansulite Premium 3% AFFF Concentrate Mil Spec

Alcohol Resistant Foam Firefighting Concentrates (AR-AFFF)

Able to be used on hydrocarbon fuels, polar fuels (alcohol, ketones, methanol and MTBE products) at a 1% and 3% proportioning rate, and also on Class A fires. These foams include:

- Ansulite ARC Alcohol-Resistant 3% 6% AFFF Concentrate
- Ansulite Arc 3 or 6 Freeze Protected
- Jet-X 2 ¾ % High Expansion Foam Concentrate

Concentrates

Specially used for Class A fires and training purposes.

- Silv-ex Class A Fire Control Concentrate
- Ansul-A Municipal Class A Fire Control Concentrate
- Training Foam

HALOTRON*

We sell Halotron! In addition to our expansive product line of clean agents, we have Halotron, a replacement for halon 1211 in streaming and local applications. We buy direct so that we can offer the most competitive pricing available, in a variety of quantities tailored to meet your situation!

We buy Halotron! We offer the most competitive market pricing for any quantity of Halotron. We will handle freight costs, paperwork, and arrangements, to ensure you have a stress-free transaction.

We can provide lab certification! The Halotron that we sell is approved by the Federal Aviation Administration (FAA) for airport applications, and US Environmental Protection Agency (EPA) as an acceptable substitute for halon 1211. Our Halotron is tested by an independent testing facility to ensure its quality. We can offer lab certification to demonstrate purity.

Chrissy's Corner
Randomness from the Editor-in-Chief

First off, congrats to Jack Kreckie, from Massport Fire Rescue, who emailed me his favorite summertime activity and won the \$50 Amex gift card! Here is an excerpt from his email:

"I so look forward to working in my garden in the summer. As soon as the ground gets soft, it's time to start raking, liming and fertilizing the lawn. As the spring bulbs start coming up, it's time to get the edges cut in the beds and order the mulch."

"If you haven't tried gardening you might consider it. It is a GREAT stress reliever! There is such a reward for your efforts that is there for you to enjoy all summer long. While you are grilling up that Nathan's hot dog, you can feel the pride of your labor."

Jack, you will receive a \$50 American Express gift card for participating in our survey. Thanks!!

#1 - So, as I have been mentioning the past few issues, my husband and I FINALLY bought a house!! After the first deal going sour literally AT the closing table, we bought our dream townhouse and are fixing it up right now. Phew!

#2 - We have changes all over the place! Not only am I revamping my townhouse at home, but also am I revamping a bunch of new flyers and Wesco is introducing a bunch of new flyers and brochures! We've added halotron to our product line and can offer customers several different sizes and competitive pricing with quick

Montreal Protocol Celebrates 20th Birthday!

Symposium 20th Anniversary of the Montreal Protocol

On September 23 - 26, a select group of speakers integral to the adoption, ratification, and adherence of the Montreal Protocol will gather in Athens Greece to discuss the success the Montreal protocol has seen since its adoption in 1987. This symposium is called, "Ozone Depletion: from its discovery to Envisat and Aura."

Per the Montreal Protocol 20th Anniversary website, "The Symposium will take place in the Athens Concert Hall, Greece, close to the dates of the 19th Meeting of Contracting Parties to the Montreal Protocol and it will bring together distinguished scientists, policy makers, industry people and NGOs who have contributed to the protection of the ozone layer. Symposium participants will review scientific progress made since the signing of the Protocol in 1987 and will highlight the lessons this process holds for the continued implementation of the Protocol and for addressing other global environmental issues."

In addition to the symposium, this very exciting meeting of influential members responsible for the Protocol will feature several educational sessions that will take a look at the past, present, and future of the Protocol. Recent scientific findings relevant to the Protocol will be unveiled and discussed for the first time.

On September 16, 1987, the Montreal Protocol was introduced with the intent to reduce greenhouse gas emissions and begin the recovery of our ozone layer. Twenty years later, its significance and impact on the world and the ozone layer can be seen throughout the achievements reported by the United Nations Environment Programme. In addition, the Protocol has been strong and many countries have
